INSPECTION PORT 120mm

ILT120

Universal inspection port for tanks type ILT120

Innovative inspection port with robust design
The VETUS ILT is an innovative inspection port which facilitates easy opening, inspecting and cleaning the tank, even after being closed for a long time. The inspection port has a counter flange and a rubber seal which are inserted into a Ø 159 mm hole in the tank. All that needs to be done is tighten the 4 supplied bolts which compresses the rubber seal to ensure perfect sealing. The "clamp and seal" design simplifies installation, making the drilling of a Ø 159 mm hole the hardest part in the installation! The black blind plate can be replaced by various connection kits.
